Aiming Beyond the Clouds—An Ultra-Luxury Residential Development on Sheikh Zayed Road, Dubai

World's Tallest Residential Tower

Avior

By Acube Developments

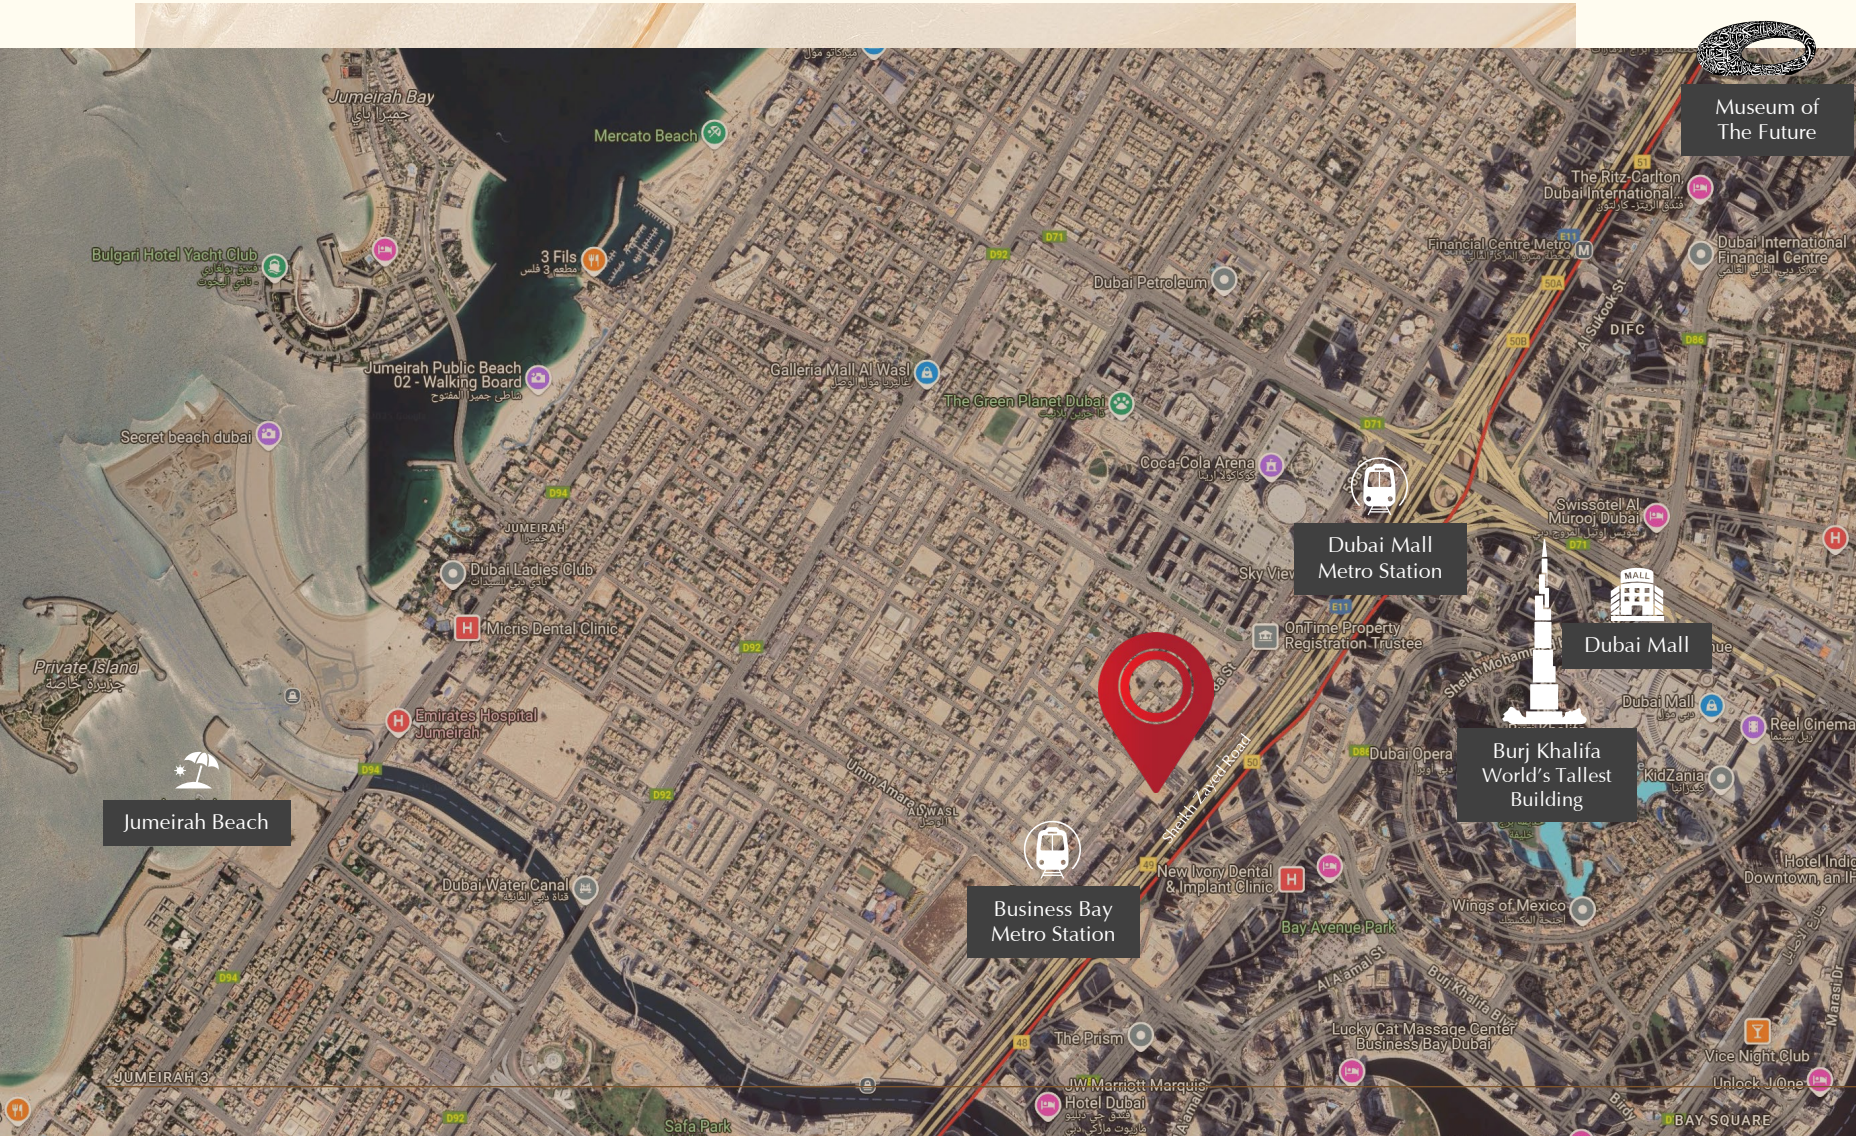

Avior

A Rarified Jewel Transcending Between Earth and Sky

Named after AVIOR, a brilliant binary star in the southern constellation of Carina, this celestial marvel is among the brightest in the night sky. Positioned approximately 560-660 light years from the Sun, its primary star is an evolved giant, radiating with immense luminosity as the third-brightest in its constellation. Its companion star, with an apparent magnitude of 3.85, shines brightly enough to be visible to the naked eye—if it stood alone. This secondary star is a hot, hydrogen-fusing main sequence star, a beacon of energy and endurance.
